

AVIONICS SYSTEM TRAINER 1

Aircraft avionics trainer provides instruction on the following systems:

- Dual (2) Nav. Comm. Radio Packages
- Transponder
- DME
- Marker Beacon
- Global Positioning System (G.P.S.)
- Encoding Altimeter
- Automatic Direction Finder (A.D.F.) & R.M.I.
- Horizontal Situation Indicator System (H.S.I.)
- Instrument Landing System (I.L.S.) and VOR
- Intercom System
- Headsets (2)
- Audio Panel
- Microphones (2)

The system comes complete with all wiring, antennas and transmitters, receivers and indicators.

The trainer mounted on a movable stand and comes complete with all instructor, student, and service manuals. The trainer is complete with all software and hardware required for its full operation.

The trainer comes complete with all flight line testing equipment to allow checking of all the avionics systems listed above. The testers are of a type used in the aviation industry. The trainer requires only 110/220 VAC for its full operation.
