

DUAL A.C. GENERATOR SYSTEM TRAINER

The trainer comprises of:

- Two Independently Driven Constant Speed AC Generators
- Two 240 VAC 50 Hz Motors and Gearboxes as the Generator Drivers
- Two Interconnected Generator Control Units
- Split Bus System
- Typical Cockpit Instrumentation and Controls
- Representative Loads including TRU's with Associated D.C. Busses

The system is laid out to depict a typical aircraft a.c. system, and contains standard aircraft components and wiring.
